

## **POLICY – CONFLICT MINERALS**

Swedrive actively works to ensure that all products supplied by Swedrive are free of conflict minerals.

Swedrive's suppliers are expected to take steps to ensure that the parts or products they supply to Swedrive are conflict-free and do not come from conflict zones specified under Section 1502 of the Dodd-Frank Act.

The minerals defined as conflict minerals are:

- Tantalum
- Tin
- Tungsten
- Gold

Suppliers who deliver products that could be suspected of containing the above substances must certify that these products are free of conflict minerals.
